

PSPP 336 Landscape Construction

Spring 4 credits Lecture 2, Lab 2

Prerequisite: PSPP 331, PSPP 335 (may be taken as Corequisite)

Understanding of construction materials used to create the built landscape. Design and production of working drawings for walks, patios, steps, ramps, retaining walls, decks, fences, irrigation systems, and other landscape features. Production of landscape construction portfolio which details a complete site development project including cost estimating and bidding for construction.
